

WOODS® GRADING SCRAPERS

Model GSS60 and GSS60P

Representative images

The Woods® GSS60 and GSS60P Grading Scrapers are rugged tractor attachments that loosen, level and smooth dirt and gravel in driveways, yards and fields. Both models are 162,3 centimeters wide, with a working width of 150 and fit 20 to 45 horsepower tractors with Category 1 hitches.

The GSS60P is a premium attachment with scarifier teeth for deep tillage. The scarifiers are adjustable so that you increase your performance by positioning them for the type of work or material.

- Heavy-duty mast plate creates more down force for a smoother surface and virtually eliminates a washboard effect
- Adjustable skid shoes and scarifiers* increase performance
- Tall side frames hold more material for leveling
- Beveled leading edges on the skid shoes and structural reinforcements keep this scraper strong for years of use
- Reversible/replaceable high-carbon cutting edges increase work life and are easy to maintain

| SPECIFICATION | GSS60/GSS60P |
|------------------------------|-------------------|
| Tractor Engine HP | 20 - 45 hp |
| Tractor Hitch | Cat 1 |
| Working Width | 150 cm |
