

# WOODS® TURF BATWING®

## Model TBW144

**TBW180**  
Shown with chain shielding

Requiring a minimum of 30 hp, the TBW144 finish mower is designed for superior cut quality and built for a long, durable life. Engineered with Woods' superior standards, this flexible wing finish mower is designed to provide maximum performance and precision cutting in applications, such as large lawns, parks and sporting fields.

- Tapered roller bearings in wheels and greasable blade spindles
- Features a strong, 4,17 mm steel deck and a powerful 75 hp gearbox
- Caster arms can be adjusted inboard for more maneuverability and improved performance on rough ground
- Rounded front corners and tapered deck sides improve maneuverability and grass discharge while box-style construction offers superior deck strength
- Options include highway light kit and anti-scalp roller kits
