

WOODS® DISC HARROWS

Model DHS80

DHS64 Shown

Whether you are breaking new ground for a garden, or tilling an existing nursery, food plot, vineyard or farm, Woods has the right – the best – disc harrow for your land. You will get years of productive, reliable, dirt-turning work.

Requiring a minimum of 35 hp, the rugged DHS80 is easy to use due to innovative engineered features like individually adjustable disc gangs that reposition with a single pin.

- Ideal for tractors between 35 to 55 hp
- Built with high-strength steel for superior design and superior durability
- Tapered frame design balances individual disc gangs for easy adjustments
- Mud scrapers that prevent clogging, increase productivity
- Heavy down force makes each blade dig deeper, work harder in one pass
- Standard furrow fillers
